To: True Source Honey Certified Members

True Source Honey is pleased to announce a full transition to Intertek as the sole Certification Body for the administration of the True Source Certified program. Intertek has global reach and a long history of expertise in food safety auditing and certification. They are also leading innovation in the food traceability space with the recent launch of their proprietary HoneyTrace Hive to Jar Traceability Solution.

Intertek was the original partner when True Source was first launched in 2011 and recently assumed responsibility for all auditing and load inspections in India. True Source is now extending Intertek's services across all countries as the sole service provider. **Intertek will be providing all audit and load inspection services as of January 1, 2026.**

Certified members of True Source Honey are encouraged to reach out to Intertek at [truesource@Intertek.com](mailto:truesource@Intertek.com) to make any necessary account setup arrangements if you have not already done so.

NSF will continue to provide service through December 31, 2025 and will close out any open audits. Questions can be directed to Danielle Chester at [dchester@nsf.org](mailto:dchester@nsf.org). True Source appreciates NSF's many years of service to the True Source Certified program.

As always, inquiries to True Source Honey can be directed to [info@truesourcehoney.com](mailto:info@truesourcehoney.com).
